The attached replacement sheets of drawings includes amendments to Figures 1-3 to clarify what reference numerals 2 and 3 are referring; and an amendment to Figure 4 that adds the legend "PRIOR ART." The attached replacement sheets of drawings, which includes Figures 1 to 4, replaces the original sheets of drawings which included Figures 1 to 4.

Annotated or marked-up sheets of drawings for Figures 1 to 4 are attached. The annotated sheets of drawings show the proposed drawing corrections in red ink.

#### **IV. REMARKS**

Claims 1-17 are currently pending in the application and the Office Action rejected Claims 1-17. By the foregoing amendments, Applicants cancelled Claims 1-17 without prejudice and added new Claims 18-36 to further clarify, more clearly define and/or broaden the claimed invention, and expedite receiving a notice of allowance. Pursuant to 37 C.F.R. § 1.121(f), no new matter is introduced by these amendments. Applicants believe that Claims 18-36 are now in condition for allowance.

Please note that Applicants' remarks are presented in the order in which the issues were raised in the Office Action for the convenience and reference of the Examiner. In addition, Applicants request that the Examiner carefully review any references discussed below to ensure that Applicants understanding and discussion of the references, if any, is consistent with the Examiner. Further, the following remarks are not intended to be an exhaustive enumeration of the distinctions between any particular reference and the claimed invention. Rather, the distinctions identified and discussed below are presented solely by way of example to illustrate some of the differences between the claimed invention and that reference.

##### **A. Oath/Declaration**

The Office Action stated that the oath or declaration was defective. The Office Action also stated a new oath or declaration in compliance with 37 C.F.R. § 1.67(a) identifying this application by application number and filing date is required. The Office Action explained that the oath or declaration was defective because the inventors listed

**Appl. No.** : 10/692,141

on the oath/declaration are different than those listed on the specification. The Office Action further stated that all inventors must be listed appropriately on the oath/declaration.

Applicants respectfully traverse this rejection because the inventors listed on the Declaration are the same as those listed on the specification. In particular, the application as originally filed listed "Ai Wen" as one of the inventors. The Declaration filed on June 11, 2004, listed "Arvin Patel" as one of the inventors. "Ai Wen" and "Arvin Patel," however, are the same person. "Ai Wen" is simply the Chinese speaking name of "Ai Wen." Thus, the Declaration and application include the same inventors, but the specification lists the Chinese speaking name of "Ai Wen" while the Declaration includes the inventor's English name of "Arvin Patel." Accordingly, Applicants respectfully request that this requirement for a new Declaration be withdrawn.

**B. Information Disclosure Statement**

The Office Action stated that the information disclosure statement filed April 14, 2005 fails to comply with the provisions of CFR 1.97, 1.98 and MPEP § 609. In particular, the Office Action stated that foreign patent 223,700 is missing Fig. 1 and therefore has not been considered. The Office Action stated that the other foreign patents crossed out were not considered because they fail to include an English abstract, a translation or a statement of relevance. The Office Action stated that, as for the court documents/proceedings, there has not been provided an explanation of relevance or an explanation as to why these papers are pertinent (so as to merit inclusion as prior art for

this application). The Office Action stated that, if portions of these documents are pertinent, these portions need to be specifically directed to and identified. The Office Action stated that these references have been placed in the application file, but the information referred to therein has not been considered as to the merits.

As to foreign patent 223,700, the enclosed Information Disclosure Statement includes a new copy of foreign patent 223,700 with Figure 1.

As to the foreign patents that were not considered because they fail to include an English abstract, a translation or a statement of relevance, Applicants respectfully submit that these foreign patents may be pertinent, *inter alia*, for the structure shown in their drawings and therefore requests consideration of these foreign patents. In addition, any available English abstracts and other information related to these patents is included in the enclosed Information Disclosure Statement.

As to the court documents/proceedings submitted previously, Applicants submitted these documents in accordance with MPEP § 2001.06(c). In particular, MPEP § 2001.06(c) states:

**Where the subject matter for which a patent is being sought is or has been involved in litigation, the existence of such litigation and any other material information arising therefrom must be brought to the attention of the U.S. Patent and Trademark Office.** Examples of such material information include evidence of possible prior public use or sales, questions of inventorship, prior art, allegations of “fraud,” “inequitable conduct,” and “violation of duty of disclosure.” Another example of such material information is any assertion that is made during litigation which is contradictory to assertions made to the examiner. *Environ Prods., Inc. v. Total Containment, Inc.*, 43 USPQ2d 1288, 1291 (E.D. Pa. 1997). Such information might arise during litigation in, for example, pleadings, admissions, discovery including interrogatories, depositions, and other documents and testimony.

MPEP § 2001.06(c), at 2000-6. Applicants submitted these documents because the litigation involved subject matter generally relates to tables and, in particular, to tables with blow-molded plastic table tops. Applicants submitted these documents out of an abundance of caution because Applicants wanted to ensure that all documents were disclosed to the Examiner in accordance with MPEP § 2001.06(c).

**C. Objections to Drawings**

The Office Action objected to the drawings and stated that Figure 4 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. *See* MPEP § 608.02(g). The Office Action also objected to the drawings because it is unclear what reference numerals 2 and 3 are referring and it appears that they are referring to the same feature.

As set forth above, Applicants amended Figure 4 to include the “Prior Art” legend. Therefore, Applicants request that this objection to the drawings based upon the omission of the legend “Prior Art” be withdrawn.

Applicants also amended Figures 1-3 to clarify what reference numerals 2 and 3 are referring. Consequently, Applicants request that this objection to the drawings be withdrawn.

**D. Objection to Specification**

The Office Action objected to the disclosure because the Office Action contends that the incorporation of essential material in the specification be reference to an

unpublished U.S. application, foreign application or patent, or to a publication is improper. The Office Action stated that Applicants is required to amend the disclosure to include the material incorporated by reference, if the material is relied upon to overcome any objection, rejection or other requirement imposed by the Office. The Office Action also stated that the amendment must be accompanied by a statement executed by the Applicant, or a practitioner representing the Applicant, stating that the material being inserted is the material previously incorporated by reference and that the amendment contains no new matter.

As set forth above, Applicants amended paragraph [042] to delete the following statement: "Further details regarding a folding table without side rails is found in Chinese Patent Application No. 02269593.1, filed September 24, 2002, entitled 'UTILITY TABLE WITH NO SIDE RAIL,' which application is hereby incorporated by reference in its entirety." Applicants deleted this statement without prejudice because the material disclosed in this reference is not currently being used to overcome any objection, rejection or other requirement imposed by the Office. Accordingly, Applicants request that this objection to the specification be withdrawn.

**E. Response to the Section 112 Rejection**

The Office Action rejected Claim 16 under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The Office Action states Claim 16 recites the

limitation “one end of the tabletop” in lines 14-15, but there is insufficient antecedent basis for this limitation in the claim.

As set forth above, Applicants cancelled Claim 16 without prejudice. Accordingly, Applicants respectfully request that this Section 112 rejection be withdrawn because it is now moot.

**F. Double Patenting Provisional Rejections**

The Office Action provisionally rejected Claims 1-8, 13 and 14 under the judicially created doctrine of obviousness-type double patenting as being unpatentable over Claims 1-8 of co-pending U.S. patent application serial no. 10/681,975 in view of U.S. Patent No. 6,058,853 issued to Pinch.
